DETAILED ACTION

Election/Restrictions

Claims 1-29 are directed to an allowable apparatus. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 30-31, directed to the process of making or using the patentable apparatus, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 30-31 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in the Office Action of 16 January 2004 is hereby withdrawn.

Allowable Subject Matter

Claims 1-31 are allowed. The following is an examiner's statement of reasons for allowance: The prior art does not disclose a pyrolysis plant comprising a screening device having an interior for receiving solid residues, a rod wound along a helical line and bounding said interior, and a longitudinal axis with said screening device rotatable about said longitudinal axis. The prior art also does not disclose a method for screening solid residues from the pyrolysis plant comprising providing a screening device having a longitudinal axis, an interior, and a rod wound along a helical line; introducing residues into the interior of the screening device rotating about the longitudinal axis; and conveying coarse residue constituents with the rod for separating the coarse residue constituents from the pure residue constituents.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Riegenmann et al. (USPN 6,622,869) ; Boretzky et al. (USPN 6,484,882); and Reilly (USPN 4,261,795). Riegenmann et al discloses a solids separating device using a moving belt and rollers. Boretzky et al. and Reilly disclose pyrolysis plants for solid waste.
